

Your reliable partner in the field of packaging

BELAND

Company`s presentation

2002

The company begins its development with the production of aluminum caps for injection and infusion medicinal forms;

2008

Partnership agreements are concluded with large foreign factories on the joint production of glass containers and rubber capping products;

2009

The production of combined (aluminum-plastic) and quick-release caps begins; the range of products is expanding;

2018

The equipment park is increasing; the production of polymer spray dispensers and triggers is being launched;

2019

A workshop for coloring and decorating glass and plastic packaging has been launched;

2021

Launch of several exclusive projects within the framework of import substitution, including: production of caps for dental and insulin cartridges, polymer rods and finger stops for pre-filled syringes, containers for lenses, strike stops, measuring cups and spoons for syrups, screw caps for drip and syrup vials.

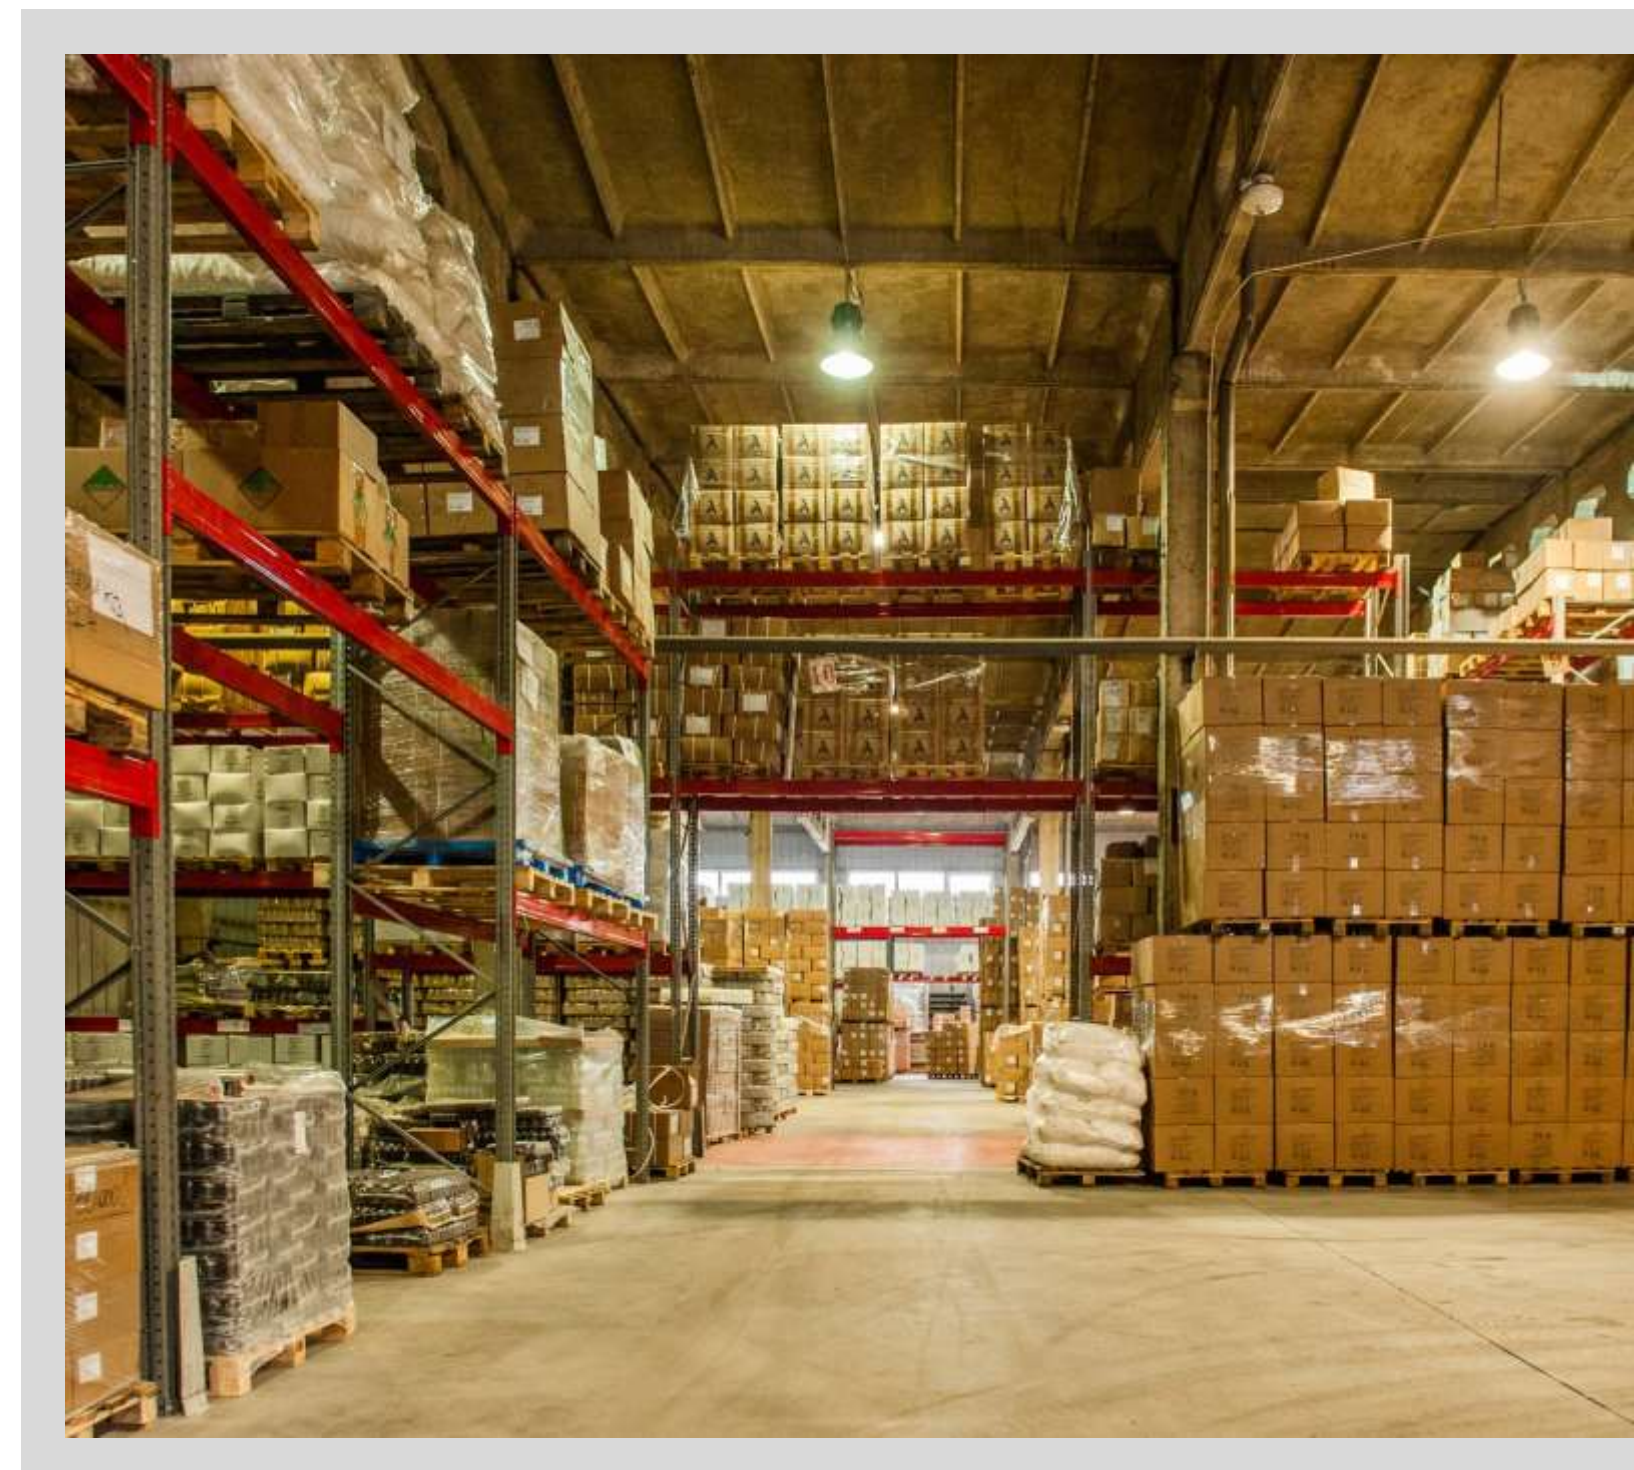

We are often contacted by companies experiencing inconveniences when working with current suppliers.

Cooperation with foreign suppliers requires:

- investments in goods;
- organization of the warehouse program;
- overcoming the difficulties associated with customs clearance, uncontrolled marriage and claims.

In turn, not all Russian companies can guarantee:

- compliance with production standards;
- delivery dates;
- acceptable level of quality;
- sufficient technical equipment.

Being a production association, on the one hand we offer a full range of first-person services, and on the other hand we have a significant financial resource to optimize your overhead costs. In other words, by starting cooperation with us, you will forget about the inconveniences that may arise. Exactly:

You will not have to plan deliveries for 5-7 months ahead, we will do this

You will have the opportunity to choose a convenient batch of goods to order

You will be freed from the burden of customs and transport costs, which will reduce the amount of required financing and free up financial resources for development

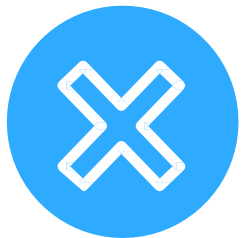

You will acquire a partner working to the highest standards, focused on quality, able to be responsible for the product produced

It will be possible to change the design of the packaging used more quickly

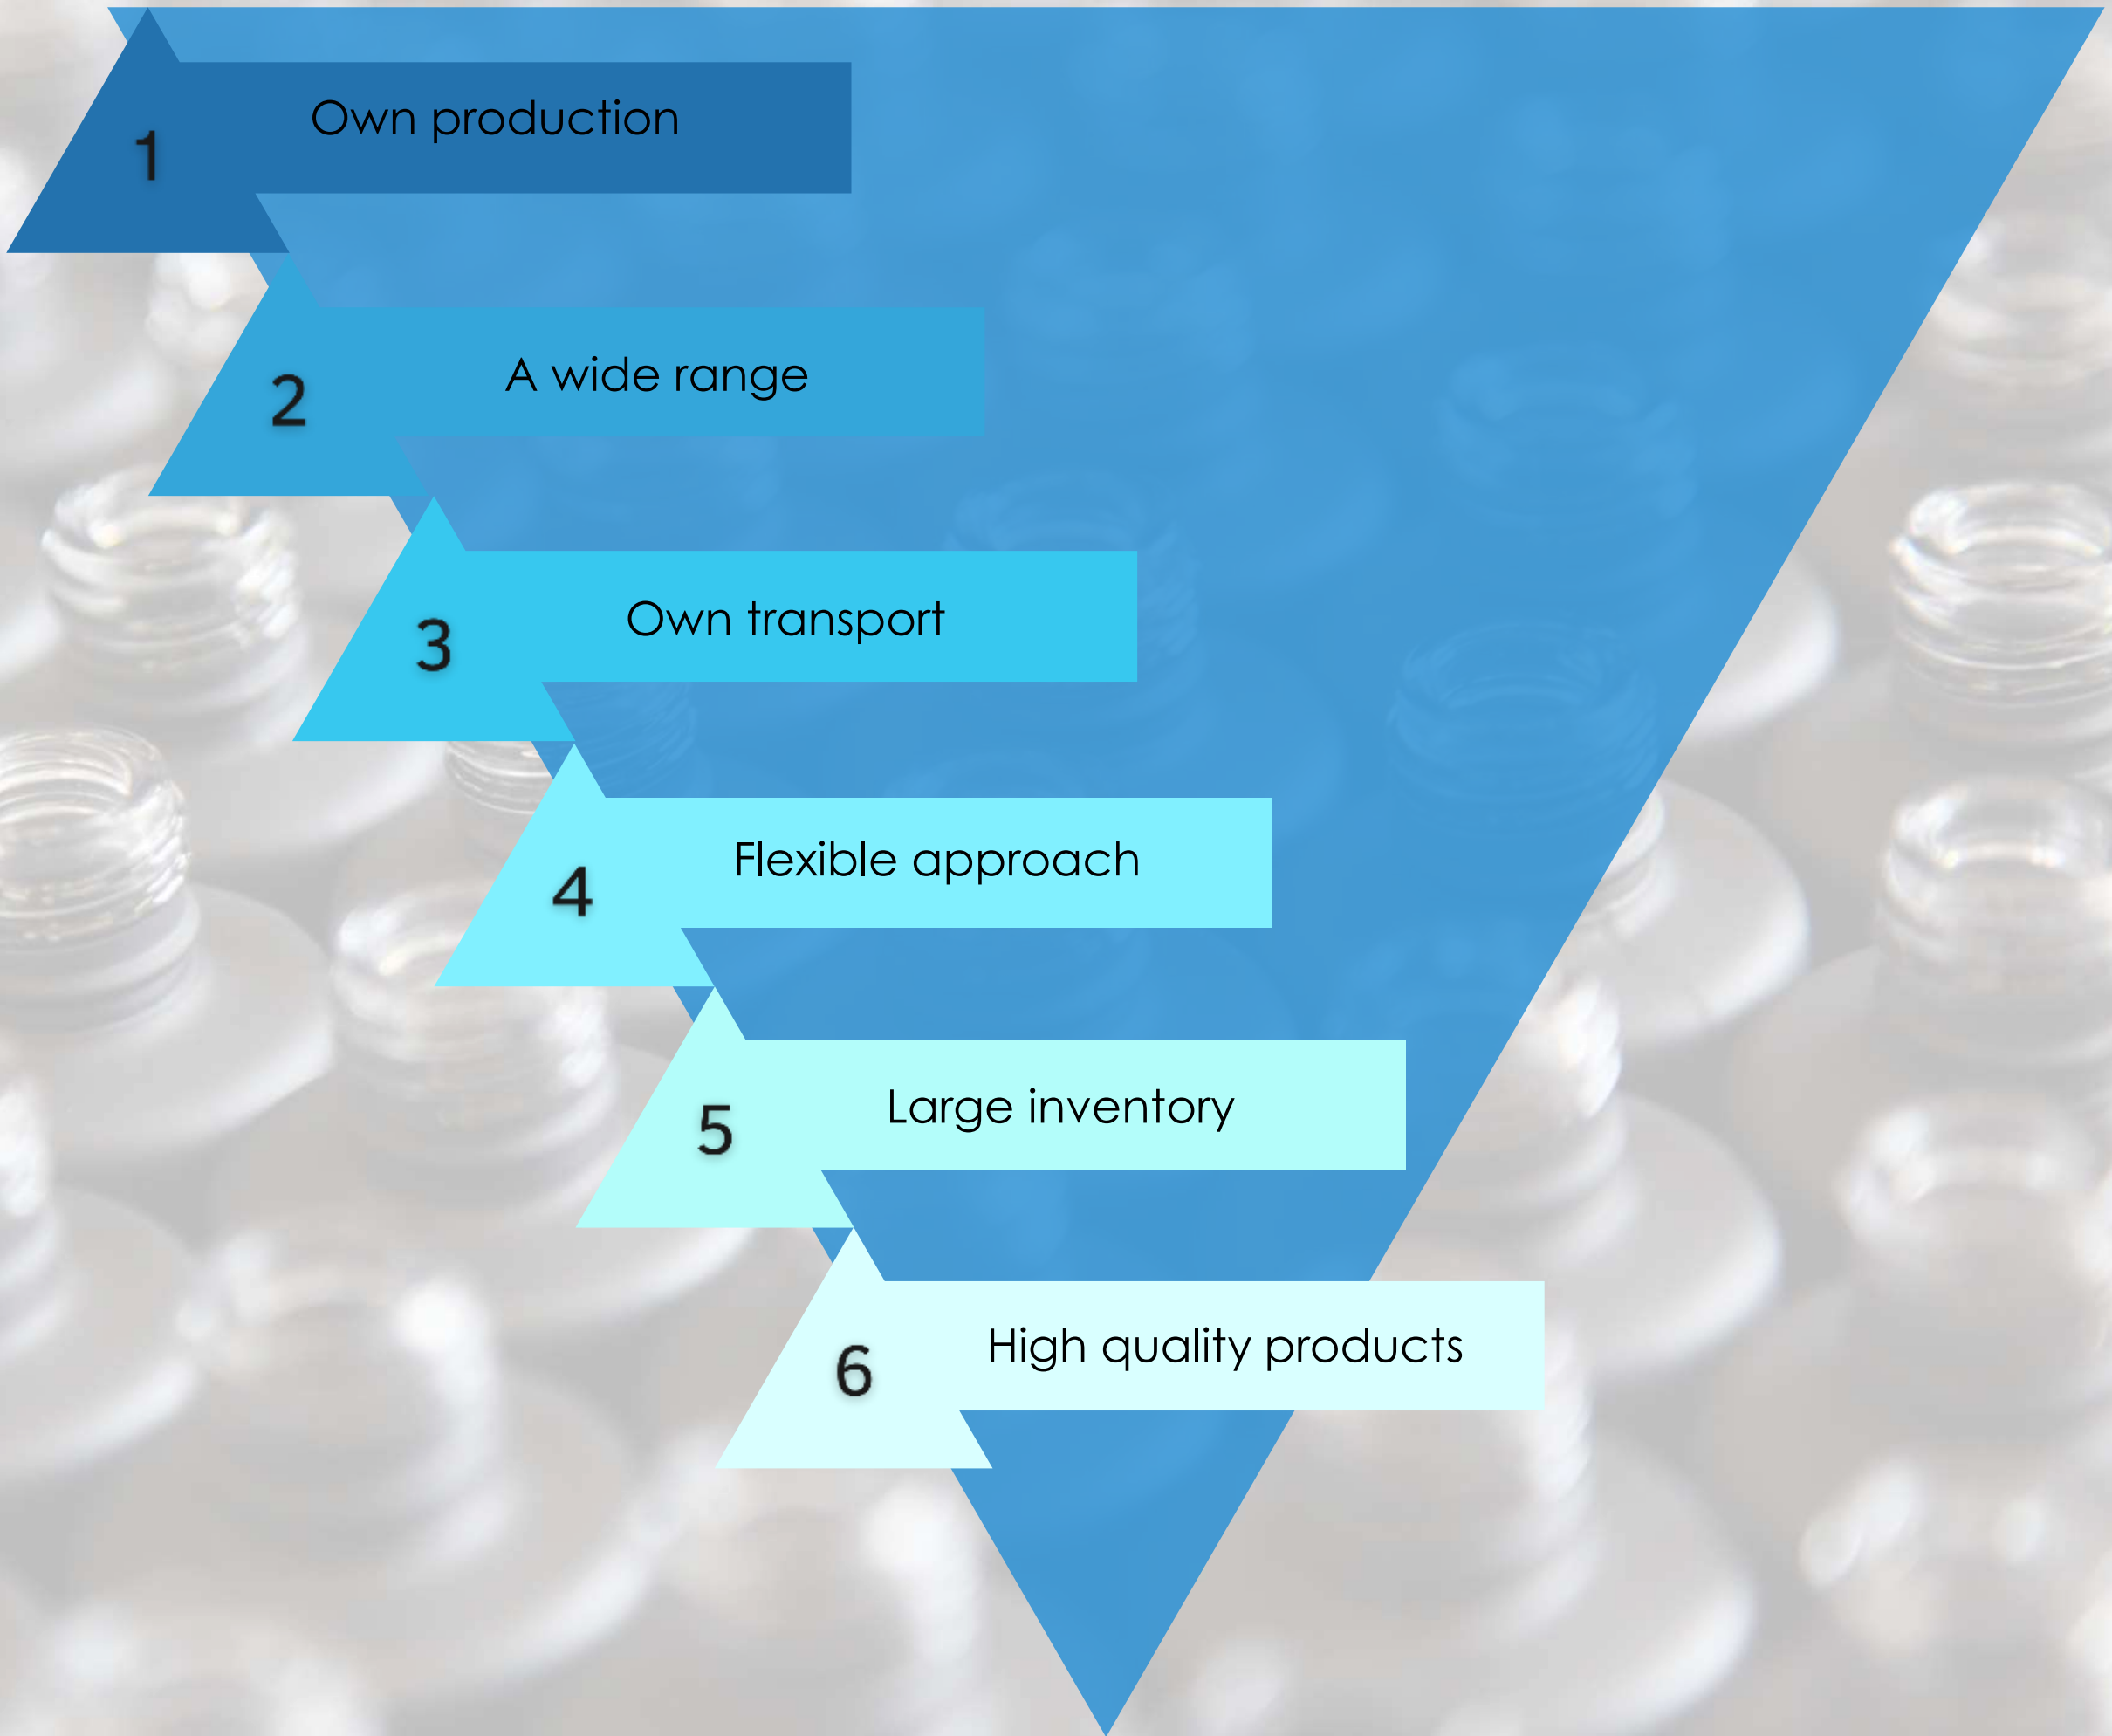

The production and delivery time will be reduced

Avoid possible marriage when decorating

**COMPANY`S
ADVANTAGES**

- Having extensive experience working with pharmaceutical industries, we have integrated high requirements for the quality of our services at all stages of the work.
- Our production meets the advanced standards of the industry, a quality control system has been implemented. We understand the specifics of the market and can offer various options for cooperation for our partners.
